THE Modocs are a small bandof wandering Indians in Southern Oregon. Up to the attempt to locate them upon a reservation, they were peaceful enough, being friendly with the few settlers they came in contact with.

A MALICTOUS libel is going the rounds that very target and the second of the rounds that very target.

that vegetation is so scarce at Cape Cod-hat two mulien stalks and a whortleber-ry bush is called a grove. The truth is that unless there are three whortleberry bushes they never think of saying grove. Walla Walla, in Washington Territory, has what it suphemistically terms a "society for protection against cattle and horse-thieves," with a central council, and branches for the administration of justice. These branches vary from ten to twenty feet from the ground.

twenty feet from the ground.

A SOCIETY has been formed in New York to provide decent apparel for children whose parents are too poor to clethe them suitably to attend the public schools. There are at least twenty-four thousand vacant seats in the schools, and the children who will fill them for the most part attend charity schools, where clothing and in some instances dinners are provided for them. But these charity schools are partially sustained by State aid, whereas their expenses should be wholly met by their projectors.

### Who'd be a Jewelry Clerk.

were taught that they are amenable to the projectors.

The other day at about 12 m. a carriage close the control of the contro

### Polygamy to be Broken Up.

Polygamy to be Broken Up.

President Grant is reported as being thoroughly determined to break up the beastly and unlawful system of polygamy in the Territory of Utah. He has sent a special message to Congress asting for such additional legislation as will enable the Government more efficiently to enforce existing laws against this orime. Three things are necessary to this end: First, the selection of Juries must be placed under the control of the officers of the United States, and not under that of local officials, who are sure to be Mormons, and just as sure to select Mormon juries. Secondly, the power of the local courts of the Territory must be so curtailed that they cannot nullify the proceedings of United States Courts. Thirdly, the judicial and executive appointees of the Government in Utah must be men who will see to it that the laws against polygamy are rigidly enforced. The President should be supplied with all the legislation he needs; and then he should wisely but firmly use the power to put an end to this disgrace jupon our common country. It is high time that Mormons were taught that they are amenable to the laws of the United States, and that polygamy, being a crime according to these laws, cannot be shielded from penal exposure by being made part of a religious system. Mormons have a right to worship God according to the dictates of their own conscience; but this confers no right to violate the just laws of civil society. The Republican Convention that nominated Abraham Lincoln, in 1860, declared it to be "the right and the duty of Congress to probabilism polygamy and slavery." The latter is dead, but the former still lives. In 1862 Congress passed an act making it a crime and providing for its punishment; and yet it still lives, in defiance of law. It is intolerable that the law should be practically treated as a mere sham.—Exchange.

ng but little if any benefit to the public Ing but little if any benefit to the public. The managers of political parties made Washington a great central depot, from which they flooded the country with speeches, pamphlets, and documents for the purpose of carrying elections; and, by the use of some congressman's name, they charged the cost of this enormous mail transportation to the Treasury of the United States. Such a system, though it had become a usage, was not less a fraud

ly assail him, man can find no secure retreat, he may at least learn to mitigate their horors. Although incapable of enduring any great change of temperature in his body, he is known to be capable of passing safely through many excessive changes in the atmospheric medium which surrounds him.

It is well known to physiologists that when the heat of the body is reduced to a point where freezing begins the blood globines become thoroughly disorganized, and when the disorganized fluid, thus poisoned, re-enters the circulation it corand when the disorganized fluid, thus poisoned, re-enters the circulation it corrupts the blood. Experiments on animals indicate that the deadily effect does not occur while they are in a semi-frozen condition, but subsequently, when the heat is increased and circulation quickened so far as to allow the disorganized matter to penetrate the blood vessels and thus overwhelm the nervous system. It has often been noticed that the fatal has often been noticed that the fatal moment arrives just when relief and com-fort reach the sufferer. Sir John Franklin related instances in which fishes in the polar regions when laid on ice became instante, but, when removed, recovered tallty after a few days.

mate, but, when removed, recovered vitality after a few days.

Travellers have sometimes observed that famehemeha days and the present of the confidence in anything that is some kinds of fishes in the shallow Sibert and lakes (when frozen to the bottom) are restored to life on the very gradual melting of the water in spring, and it has been said that even the gold fish revives from frozen water in which he has been confined. While the delicate human frame is, of course, unable to bear such thermal variations, it has been inferred, from such capabilities in other animals and from the other circumstances mentioned, that, by allowing the frozen parts to thaw by almost infinitesimal degrees, sudden alteration of the life blood may be represented, the shock to the nervous system of the life blood may be some to have been done, and after two days?

Travelger have sometimes observed that same has a been confined. While the delicate human frame is, of course, unable to bear such the work of assimilating the food and in carry-has been confined. While the delicate human frame is, of course, unable to bear such the minimal remains and from the other circumstances mentioned, that, by allowing the frozen parts to haw by almost infinitesimal degrees, sudden alteration of the life blood may be prevented, the shock to the nervous system everted and life saved. Among those who were lately overtaken by the late was fixed, the marriage and the serve of the first of the life blood may be forevely the control of the life blood may be forevely than the control of the life blood may be forevely than the control of the life blood may be forevely different principle from anything cover offered from them. If we will not say so, the late of the life blood may be prevented, the shock to the nervous system of the life blood may be forevely the prevented, the shock to the nervous system of the life blood may be forevely the prevented, the shock to the nervous system of the life blood may be forevely the prevented, the shock to the nervous s with speedy ceath proved their deliver-ance. From its looseness of texture, and from its harboring within its fleecy folds about ten times its bulk of air, the snow is an excellent protection. It often hap-pens that in times of intense cold the soil of the earth is forty degrees (Fahrenneit) warmer than the surface of the outlying layer of snow or the air above it. The greatest peril of the traveler overtaken by the snow hurricane is in the furious winds that eccumpany it and make the cold for the snow hurricane is in the furious winds that accompany it, and make the cold far more intolerable than it would be in a tranquil atmosphere. The acrated and porous character of the snow covering will permit the man who is buried beneath it to survive for many hours, as the mammals, of the arcic regions, who make their lairs beneath it, and as the Esquimaux, who burrow under wails of solid ice.

We may confidently expect before the

id ice.

We may confidently expect before the present Winter passes away a repetition in the mountairous parts of this State and New England of just such snow storms as have overtaken the people of Minnesota, and these practical suggestions may be o value to the benighted traveler overtaken by their blinding fury.—N. Y. Herald.

### The Utah Troubles.

The President, on February 14, sent a message to Congress calling the attention of that body to the condition of affairs in the Territory of Utah, and to the dangers likely to arise during the coming recess from a threatened condict between the Federal and Territorial authorities. The President says:

state of suffering which it is utterly impossible to describe. The pleasurable sensations and imaginative ideas arising at first, soon pass awry; they become fainter and fainter, and at last entirely give place to horrid dreams and appalling pictures of death. Specters of fearful visage haunt the mind—the light which once seemed to emanate from heaven is converted into the gloom of hell—sleep, balmy sleep, has field forever—night succeeds day, only to be lothed with never-ending horrors; incessant sickness, vomiting and total cossation of the digestive iting and total cossation of the digestive functions ensue; and death at length brings, with its annihilation of the corpo-real structure, the sole relief to the vic-tim of sensual and criminal indulgence.

We feel that, in giving some account of translucent cloth hot-beds, to be employed instead of the expensive glass frames in general use, we are doing all our gardening readers a service. We can vouch for the value of the "German Hot-Beds." having tried them very successfully many years ago. For forcing early melons, tomatoes, &c., this prepared cloth is especially adapted, as it can be tacked to boxes of any size required and cut to fit them. Little, rough, square boxes of the proper size and height, covered with the prepared cloth, can be placed over the hills in which tomato, melon or other seeds are planted, and the plants allowed bills in which tomato, meion or other seeds are planted, and the plants allowed to stand, without transplanting, until all danger of frost is over, when the boxes may be taken off and packed away care-fully for another season.

Take white cotton cloth, of a close tex-

Take white cotton cloth, of a close texture, stretch it, and nall it on frames of any size you wish; mix two ounces of lime water, four ounces of limeed oil, one ounce white of eggs separately, two ounces of yolk of eggs; mix the lime and oil with a very gentle heat, beat the eggs separately, and mix with the former. Spread this mixture, with a paint brush, over the cloth, allowing each coat to dry before applying another, until they become water-proof. The following are some of the advantages these shades possess over glass: s over glass : . The cost being hardly one-fourth.

1. The cost being hardly one-fourth.
2. Repairs are easily and cheaply made,
3. They are light: they do not require
watering; no matter how intense the heat
of the sun, the plants are never struck
down, or faded, or checked in growth;
neither do they grow up long, sickly, and
weakly, as they do under glass, and still
there is abundance of light.

The heat entirely arising from below, is
equable and temperate, which is a great
object. The vapor arising from the manure and earth is condensed by the cool air
passing over the surface of the shade, and
hangs in drops upon the inside, and there-

flowing bowl and drowned her vexations in royal "tanglefoot," seldom enloying a sober period. Mutual friends still, however, endeavored to bring about the union of Lunaillo and Kamamalu, and night have succeeded had it been possible to get either of them sober enough to stand before the altar. When "Bill" was sober it turned out that "Vie" was drunk, and when "Vie" was sober "Bill" was drunk. Finally the attempt to unite the two branches of the family was abandoned, and the poor princess, so the romance runs, drank herself to a premature grave. The young king is therefore yet single, and for the exclusive benefit of our unmarried lady readers we will add that he is said to be particularly "sweet" on American ladies. Here is a magnificent chance for some of our belies to capture royal game, and only think of it—a king at that,—Exchange.

### Power of Comprehension.

Rower of Comprehension.

1. It is said of Thorsan, he would take up any given number of lead penells without the count of the work of the country of the cou

oul, d and for at work is still in progress. At latest dates is a 130 new converts had already united with and, the Methodist Episcopal Church, under the supervision of Rev. Mr. Chandler.

### USEFUL SUGGESTIONS

ONE teaspoonful of mela One tenspoonful of melasses and one easpeonful of goose oil given to a child the early stage of croup, will relieve it

RELEF FOR BURNS.—A quick cure is to apply a layer of common salt and saturate it with laudanum. Hold it is place an hour or sq by a simple bandage. The smarting sensation disappears rapidly, and the burn gets well.

WASH FOR FACE. Take a small ple of gum benzein, boil in spirits of wine it is a rich tineture. Use fifteen drops a glass of water, three or four times lay. Let it remain on to dry. It is very acious in removing spots, cruptic

To DESTROY THE ROSE-SLUG. Practical Farmer says: "We absolutely know, and have proved, that carbolle acid soapsuds, injected over the bush through the nose of a common syringe, is an effectual cure for the rose-alug, a

also death to caterpillars."

To Wash Ham Brushes.—Never use soap. Take a piece of soda, dissolve it in warm water, stand the brush in it, making sure that the water only covers the bristles. It will almost instantly become white and clean. Place it in the air to dry, with the bristles downward, an i it will be as firm as a new brush. will be as firm as a new brush.

In purchasing furs the best test of a good article is found in the length and density of the down next the skin. This can be readily determined by blowing a brisk current of air from the mouth "against the set of the fur." If the fiber opens readily, reject the article; but if the down is so dense that the breath cannot penetrate it, or at most shows but a small portion of skin, the article may be accepted.

To Prevent the Droay of Shingles,
—Take a potash kettle or large tub, and
put into it one barrel of lye of woo! ashes, five pounds of white vitriol, and also
five pounds of alum, and as much
salt as will dissolve in the mixture.
Make the liquor quite warm, and put as
many shingles in it as can be conveniently
wet at once. Stir this up with a fork, and
when well soaked take them out and put
in more, renewing the liquor as necessary. in more, renewing the liquor as necessary Then lay the shingles in the usual man

THE following is said to be the very best of the numerous recipes for whitewash-ing: White chalk is the best substitute for lime as a wash. A very fine and brilmeither do they grow up long, sickly, and weakly, as they do under glass, and still there is abundance of light.

The heat entirely arising from below, is equable and temperate, which is a great object. The vapor arising from the manure and earth is condensed by the cool air passing over the surface of the shade, and hangs in drops upon the inside, and therefore the plants do not require so frequent watering. If the frames or stretchers are made large, they should be intersected with cross-bars about a foot square, to support the cloth. These articles are just the thing for bringing forward flower seeds in season for transplanting. Home Journal.

King Bills

The king-elect of the Sandwich Islands is a bachelor. He has been engaged several items to Victoria Kamamalu, a sister of the late king. This lady died about two years ago. It was more the late king's desire to have "Prince Bill" marry his sister than it was the former's wish to espouse Victoria. It was hoped that such an alliance would better perpetuate the Kamehameha dynasty. Victoria was anxious to capture the handsome bachelor, who was her junior by several years and did not allow

"Concealment, like the worm?" the mud, Feed upon her darmaged sheek."

In the heat entirely arising from below, is called the "Paris White." This we buy at the paint store for three cents a pound, retall. For each sixteen pounds of Paris White is abund of the white transparent glue, costing twenty-five cents (fifty cents a pound). The six teen pounds of Paris White is about so the white transparent glue, costing twenty-five cents (fifty cents a pound). The six teen pounds of Paris White is about so the white transparent glue, costing twenty-five cents (fifty cents a pound). The six teen pounds of Paris White is about so the white transparent glue, costing twenty-five cents (fifty cents a pound). The six teen pounds of Paris White is about so the white transparent glue, costing twenty-five cents (fifty cents a pound). The six teen pounds of Paris White is silved as follows:

T

MANY persons say that they have tried almost every remedy that has been recommended for humors, and they are no better now than when they commenced them, and they have no confidence in anything that is advertised to cure Salt Rheum, Erysipelas, and all similar humors. We would say to these that there is now a remedy that as yet has never failed of curing those diseases. It acts upon an entirely different principle from anything ever offered for them; it throws humor out of the blood through the skin, which is the only channel through which the system can be entirely freed from them. If you will try it, you will not say of this as you have by the others, for it will cure you. We refer to Dr. Weaver's Salt Rheum Syrup. For sale by all Druggists.

did that misguided invalid require a tonic?

He did; but not a spirituous excitant.

The writer of this brief statement is confident, from his own experience, that if the Martyr to Drugged Alcohol, had resorted to Dr. Walker's Vinegar Bitters, instead of to the poison with a medical name which proved fatal to him, he would to day be in the land of the living. The ustly popular vegetable specific contains no destructive element. It is a tonic that does not excite, a cathartic that does not does not excite, a cathartic that does not weaken, an antiseptic that neutralizes the seeds of disease in the blood and other fluids of the body, and a general alterative which arrests diseased action in the secretive organs, and restores the functional regularity indispensable to health and vigor. We are no friend of indiscriminate praise, and believe that many patent medicines are merely polson, but the experience of thousands has proved the Vinegar Britzers to be all they claim.

A San Francisco widow keeps the skull of her deceased husband in a glass case. She once remarked to a friend who was viewing the remains: "Alas! how often have I banged those bones with a broomstick. I am sorry for it now."

A CARPENTER writes to the AMERICAN BUILDER as follows: "I struck out for myself last year and cleared hearify \$3,000, using the plans and details in your magazine, which were better than an architect. Count me a subscriber for life." Our subscribers can get the BUILDER on trial four months by enclosing \$1.00 to Chas. D. Lakery. Publisher, 23 Murray Street, New York.

Professor S. Dana Hayes, endorses "The Queen's Tollet," for the Complexion, as a valuable preparation and free from poison.
